

LANDSCAPE ARCHITECTURE INTERN

JPS Consulting Engineers, located in Indianapolis, is growing and looking for a Landscape Architecture Intern. Spend the spring semester working with a dynamic team of professionals at JPS Consulting Engineers. As a LA intern you will work as a member of our site/ civil team to help design site and planting plans. Project types include healthcare, higher education, commercial, institutional, and multi-family residential. This is a twelve-week paid opportunity with a flexible start date and potential for extension into the summer.

Interns will be involved in all stages of the project from planning and concept design, to construction documents and site visits. Our work occurs mostly in the Downtown Indianapolis and Central Indiana area. With a variety of project types and scales, interns will acquire a wide range of experience while being mentored by a team of Professional Landscape Architects.

Ideal candidates:

- Are currently pursuing a degree in Landscape Architecture
- Have experience in AutoCAD, Adobe Suite, and SketchUp
- Can communicate effectively
- Enjoy creative problem solving

JPS offers large firm opportunities with a small firm culture. We understand the importance of professional growth and want to help you grow your knowledge and skills. Submit your resume using the link on our website. Portfolio or work samples may be requested at a future date.

PROJECT SPOTLIGHT:

FISHERS COMMUNITY IMPACT PROJECT

Indiana University Health, Fishers, IN

More than just a building addition, this project provided a chance to transform the IU Health Saxony campus and expand care offerings to the Fishers community. JPS worked within a large multi-disciplinary team and participated in monthly workshops to achieve a design that aligned with the mission and vision of IU Health. The project is expected to be complete at the end of 2025.

The theme of 'Nature of Indiana' and specifically, 'dunes', were used to tie interior and exterior designs together. Specialized outdoor garden spaces create a full restorative experience for anyone taking an outdoor break. Site pathways connect to Lake Saxony and were part of the strategy to earn LEED Open Space and Places of Respite credits.

Two distinct gardens, one for staff and one for patients and visitors, provide the opportunity to be immersed in nature. The visitor garden connects to the cafeteria and large two-story waiting concourse. The staff area provides privacy and protection from the weather.

20+ IU Health projects completed by JPS

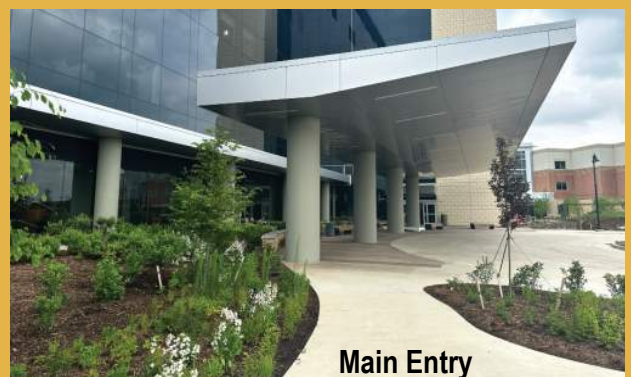

JPS has had a long partnership with IU Health Network and vast experience in healing garden design. Knowing that navigating health concerns can be taxing, we strive to create truly healing environments for patients and staff, anchoring facilities in the landscape and creating an welcoming environment from the moment a visitor enters a campus.
